Read Me

1. Please note that I have used google colab to write the code.

2. The code is divided into various code cells. Each cell is numbered at the top of the cell.For example ## Cell 0 ## , ##Cell 1 ## etc

3. **The purpose of the code is very well written on the top of the code cell itself.Therefore, the code is self explainable.**

4. Please give the path to the files in cell 1.The name of the files are written in code itself.

5. Execute the code from cell 0 to cell 11 one after another.Please note that Same colab notebook is used for both the questions.
